

How does Pietra verify their partnered manufacturers/suppliers?

group: Warehousing, Shipping & Fulfillment

Pietra has teams on the ground domestically and abroad to vet and verify every supplier is using humane practices and has safe working conditions. While we work very hard to properly vet these partners, Pietra serves as a liaison to provide its creators with the ability to communicate with and work with these suppliers. Pietra will always assist in addressing any issues creators have with their suppliers, but is not responsible for the terms, conditions, and procedures by which these manufacturers operate.

Feel free to communicate with any supplier on the platform regarding any questions or concerns you may have. You are welcome to have them send any certifications you would like to see.
