

When will I be charged for my inventory?

group: Warehousing, Shipping & Fulfillment

You will be charged for your inventory before your supplier begins to create your goods. After discussing your order via chat, the supplier will send you an invoice through the Pietra platform to purchase your inventory. Once you pay for the inventory order, production on your order will begin. Please note, a supplier may add shipping to your inventory invoice, or they may charge you for shipping when the goods are ready to ship. This will be noted on your invoice.
