

Does Pietra accommodate drop shipping?

group: Warehousing, Shipping & Fulfillment

Pietra offers 3PL services to ship your products directly to your customer. Pietra *does not* handle drop shipping. Once you place a bulk order and Pietra's fulfillment center has received your inventory, your products will be stored, assembled and shipped directly from Pietra's warehouse to your customers. We do not currently have any minimum requirements for storage and fulfillment at our warehouse, and have a large network of suppliers that can accommodate low MOQs!

If you do not want place a bulk order at this time, but are still interested in selling products with Pietra, check out our print-on-demand integration [\[here\]](https://creators.pietrastudio.com/print-on-demand-catalog)!

[If you already have inventory on hand](#), you can also work with our logistics team to send your products to our warehouse! We will then handle all of your fulfillment needs.

Head to the Fulfillment Services tab to learn more about what Pietra can do for you to streamline your fulfillment.
