

How are my products assembled?

group: Warehousing, Shipping & Fulfillment

We understand that assembly is an extremely important part of how you present your product to the world. For this reason, we have a team in place that will put everything together and if you wish, can send you a sample, even before your first order is shipped out to your customers. This will allow all of the components of your product (branding elements, packaging, etc.) to come together seamlessly, so that your customers ultimately receive the product you dreamed of.

Pricing for assembly comes at a flat fee of \$1 per product, and is available to Pietra Professional members. To see our complete rate card with costs that are only included with a Professional subscription, [click here](#).
