

What kinds of filtering options are there available when sourcing?

group: Designing & Sourcing Products

Pietra makes it super easy for you to filter when sourcing in the Creator Hub! You can filter for manufacturers based in the US vs. those that are international, as well as countless other attributes that may be important to you. These filters include, but are not limited to, suppliers that have been in business for 10+ years, those that use sustainable materials, manufacturers that are BIPOC owned, those that can accommodate low MOQs (minimum order quantities), and more! You'll find these filters on the lefthand side of the Creator Hub when you're within the Sourcing tab.
