How can I be sure my items are ready to sell?

group: E-Commerce & Sales Channels

To check if your products are ready to sell, head to the Fulfillment tab > Items Stored at Pietra. From there, you'll see that the page is separated into "Products Available for Sale" and "Products Available for Setup". Anything within your Products Available for Sale can be enabled on your shop!

For items that are available for setup, you can then set up the items for fulfillment by booking a call with our team, and/or order any necessary kitting. All of this can be done right from within the "Items Stored At Pietra" page within the Fulfillment tab!
